Product Safety Alert
FOR IMMEDIATE RELEASE

March 2, 2009

**The Electrical Safety Authority Warns Consumers about
Counterfeit Portable Cabinet Light**

Toronto, ON – The Electrical Safety Authority (ESA) is notifying consumers about counterfeit Portable Cabinet Lights and Power Supply (Portable Cabinet Lighting System), potentially sold with an appliance control as part of the system. The name of the product is: **PILOT INTERNATIONAL LTD.** - Portable Cabinet Light - PLV20-1 and PLV20-2 Series.

UL reviewed the reported Portable Cabinet Lighting System and found that there are also appliance controls marked with the company name ``SUNRONG LIGHTING CERRITOS, CA 86031`` and File E218345, but they are not corresponding - the company is not the Listee of UL File E218345.

Checks of UL records did not find any record for the company shown on the appliance control product; nor did subsequent Internet searches.

The legitimate manufacturer - ZHUHAI SHENG RONG PLASTIC METALS FACTORY of file E218345 has confirmed that the appliance controls in question were not produced by them.

Although no known exports of these counterfeit items were made to Canada, ESA has decided to release this Product Safety Alert.

UL's investigation identified that the products are not eligible to bear the UL / cUL Marks.

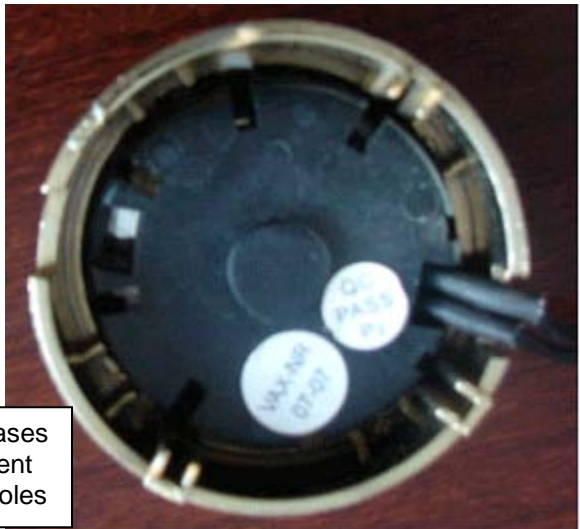

Direction: Electrical Safety Authority is requesting consumers to stop using these products immediately.

Please see photos of the counterfeit and certified products on the next pages.
